

RICCARDO ESCLAPON

I am an aspiring data scientist in love with the R programming language and automation

EDUCATION

2024
|
2020

Master's, Data Science
Denver University

📍 Denver, CO

- Online part time program. Master's in Data Science at the Ritchie School of Engineering and Computer Science

2018
|
2014

Bachelor of Science in Business Administration
University of Colorado Boulder

📍 Boulder, CO

- Bachelor of Science in Business Administration with an emphasis in Information Management. Relevant courses included Business Analytics, which I then went on to TA for the next semester. Customer Analytics, Business App Programming, Business Data Management, Marketing Research & Analytics, Business Technologies, Senior Seminar in Management.

POSITIONS

2020
|
2019

Strategic Pricing Developer
Vail Resorts

📍 Broomfield, CO

- Part-time role through the Pricing Analytics team, where I improved upon the automation I created for a project as an intern. The project involved around 60 hours of work.

2019

Guest Retention Analyst
Vail Resorts

📍 Broomfield, CO

- Maintained a reporting suite leveraging Alteryx and Tableau to produce automated high-visibility reports on a daily basis and worked cross-functionally with other teams to provide support on business critical questions. I was in charge of managing the Alteryx Server environment for my department and daily runs of workflows that built datasets and dashboards to support decisions by the EC. I was also an administrator on the Tableau Online environment and I helped manage it.

2017
|
2016

Undergraduate Teaching Assistant, Business Analytics
University of Colorado Boulder

📍 Boulder, CO

- TA for Business Analytics (MGMT3200) which taught predictive analytics through the use of Alteryx, DataRobot and Kaggle competitions

INDEPENDENT PROJECTS

2020
|
2018

Founder
PredictCrypto.com

📍 Boulder, CO

- Ongoing independent project where I look at the drivers of cryptocurrency price changes and test different trading strategies. The point of the project is to boost my own learning by exploring interesting topics and tools in data science, by creating tutorials that teach people programming. What's unique about my tutorials however, is that they are designed to use data that is never more than 1 hour old, and to provide interesting tutorials that also happen to create semi-live predictive models that could actually be used to make trades on the cryptocurrency markets. In fact, I currently use these completely automated systems to perform trades, and I currently have the capability of having automated trading systems run for 4 separate exchanges at once using 4 different XGBoost models. I have outlined this entire process step by step in an Alteryx Use Case that was approved and published: <https://community.alteryx.com/t5/Alteryx-Use-Cases/Predicting-and-Trading-on-the-Cryptocurrency-Markets-using/ta-p/494058>
